

MRC 2021 Summary Sheet

Saturday 27 November 2021

www.mrc.cat.net.au

Calling Channels

- 27MHz CBRS Channel 26 LSB (27.265MHz)
- UHF CBRS Channel 26 FM (477.050MHz)

Calling Times

- Noon, 1pm, 2pm, 3pm, 4pm, 6pm, 8pm.
- 8pm on Friday if you are at your mountain early.
- Monitor the call channels between these times as much as possible.
- Report on air any planned periods away from the radio or station shutdown.

Notes

The antenna polarisation for this event is vertical. You can of course work horizontal by arrangement with the stations you contact. The 27MHz band is quieter at night allowing for longer distance direct-wave communications. See if you can work other MRC stations that you had difficulty calling earlier in the day, especially if you are still holding the message or reply or were only able to share it using skip. Let the organisers know on the Zello channel and they can help coordinate.

MRC Station List

<u>Callsign</u>	<u>Summit</u>	<u>Team Leader</u>
MRC1	Mt Fatigue (VIC)	Tony & Julyus
MRC2	Red Rock Hill (VIC)	Mark
MRC3	Boroka Lookout (VIC)	Mitchell

Stations to listen out for

Mt Macquarie (NSW)	Wayne
Townsville (QLD)	Kerry 440
North East VIC	Brenton 444
Mt Panorama (NSW)	Kerry 352

Zello

The Zello PTT app has proved itself a valuable tool for the MRC. We highly recommend you install it and join the "MRC2021" channel as a method of advising the organisers and other stations of your operational status, and to send and receive reports regarding progress of the MRC message. Zello works quite well even in areas with poor mobile coverage.
